Professional Summary

Senior Frontend Engineer with 6 years of experience designing and building scalable, high-performance customer-facing web applications using React.js, Next.js, and modern JavaScript. Experienced in frontend architecture, Server-Side Rendering (SSR), server-driven UI, authentication, localization, and web performance optimization. Proven track record of improving Core Web Vitals, designing reusable component-based architectures, and delivering secure, responsive, accessible user experiences. Strong collaborator with cross-functional teams, contributing to system design, engineering best practices, and scalable frontend platforms.

Technical Skills

Frontend : JavaScript (ES6+), TypeScript, React.js, Next.js, HTML5, CSS3, SCSS, Tailwind CSS, Redux, Redux Toolkit, React Hooks, i18Next, Webpack

Performance & Architecture : Server-Side Rendering (SSR), Client-Side Rendering (CSR), Server-Driven UI, Performance Optimization, Code Splitting, Lazy Loading, Core Web Vitals, Responsive Design, Component-Based Architecture

Backend : Node.js, MongoDB, Firebase, REST APIs

DevOps & Cloud : Docker, Kubernetes, AWS, Nginx

Testing & Tools: Git, GitHub, Jira, VS Code, GoCD, Windsurf

Engineering : System Design, Data Structures & Algorithms, Microservices Architecture

Professional Experience

SDE III - UI

Navi, Bangalore | July 2024 – Present

- Designed and architected Navi's Personal Loan web application using **Next.js**, defining the frontend architecture and building scalable, reusable component-based modules for long-term maintainability.
- Implemented secure **HTTP-only cookie authentication**, improving session security and strengthening protection against client-side attacks.
- Integrated a **Server-Driven UI** architecture, enabling dynamic feature rollout and configuration without requiring frontend deployments.
- Optimized rendering performance of a critical Android WebView page, reducing page rendering time from **960 ms to 440 ms (54% improvement)** through frontend performance optimization.
- Designed and developed a settlement portal for Recharge and Bill Payments, streamlining transaction management and improving operational efficiency.
- Implemented a scalable multilingual solution using **i18Next**, enabling localization across the Personal Loan journey while maintaining a reusable translation architecture.
- Collaborated with backend, product, and design teams to deliver customer-facing features, ensuring high code quality through design discussions, code reviews, and engineering best practices.

SDE II - UI

Navi, Bangalore | July 2023 – July 2024

- Developed a Video KYC platform enabling lending agents to conduct secure live customer verification, improving onboarding efficiency and operational workflows.
- Designed and implemented an email communication module supporting ticket-based conversation threads, improving customer support efficiency and internal collaboration.
- Worked closely with backend teams to integrate REST APIs and deliver responsive, production-grade web applications.

SDE I - UI

Navi, Bangalore | July 2022 – Jul 2023

- Designed and developed a real-time CRM chat platform, improving customer communication and reducing response time.
- Implemented chatbot workflows to automate common customer queries, improving operational efficiency and reducing manual effort.
- Built a data annotation platform supporting machine learning workflows by improving data labeling efficiency.
- Focused on reusable React components, responsive UI development, and frontend performance optimization.

SDE - UI

Paytm, Bangalore | May 2021 – July 2022

- Built and maintained Paytm's Checkout JavaScript Library processing **25+ million daily transactions**, supporting UPI, Cards, Wallets, Net Banking, and multiple payment methods.
- Optimized the checkout experience by developing reusable frontend components and improving application maintainability.
- Created monitoring dashboards for Electronic Data Capture (EDC) devices, improving observability and operational monitoring.
- Improved developer documentation, reducing onboarding effort and simplifying payment gateway integration for merchants.

SDE - UI

GSLab, Pune | May 2019 – May 2021

- Developed a centralized Multi-Cloud Management Portal supporting VMware vSphere, AWS, and Azure for provisioning and lifecycle management of virtual machines.
- Implemented authentication, authorization, approval workflows, and role-based access control for secure cloud operations.
- Designed and developed an employee seat booking portal during COVID-19 using an interactive floor map, ensuring compliance with social distancing guidelines.
- Collaborated across engineering teams to build scalable frontend modules with emphasis on maintainability and reusable architecture.

Education

B.Tech in Computer Science

SGGSIE&T, Nanded | *July 2015 – May 2019* | CGPA: 7.24

HSC

GBMM Jr. College, Hinganghat | *May 2013 – Feb 2015* | 85.23%

SSC

Bharat Vidyalaya, Hinganghat | *Feb 2012 – Mar 2013* | 91.27%

Awards & Achievements

- Winner, **Gen AI Hackathon**, Navi
- **Meritorious Student Awards** for HSC and SSC

Projects

- **Flickr Gallery**: Implemented infinite scrolling, masonry layout, responsive UI, and data visualization using React.
- **ShopT (E-Commerce App)**: Built a React Native e-commerce application featuring product browsing, authentication, cart management, and checkout.
- **Portfolio Website**: Developed a responsive portfolio using React showcasing projects, blogs, and technical expertise with modern UI practices.

Coding Profiles

- LeetCode
- HackerRank
- GeeksForGeeks
